Newsletter 2011

More Partners

In 2011 the E3 Academy has been joined by new partners:

- Edwards, manufacturers of vacuum equipment located in Sussex,
- Bristol University, Department of Electrical & Electronic Engineering

and the long-standing participation of Siemens IA&DT has been expanded to include the whole Siemens Industry Group

More Participation

E3 scholars are:

- participating in university Open Days
- forming mentoring groups at their universities
- attending IET events such as The Young Woman Engineer of the Year Award

More Graduates

In summer 2011 all six E3 graduates who were offered employment with their sponsoring companies elected to take up those positions.

Summer School

Held in Bristol and attended by 42 delegates, the 2011 event included:

- building a switched-mode power supply
- seminars on lean manufacturing and power electronics
- scholar project presentations
- visit to Airbus, Filton
- illustrated talk on the Bloodhound Supersonic Car
- ten-pin bowling social evening.

More Scholars

- the 2011 recruitment round attracted 96 applicants
- inspired by the high quality of the applicants, many of the E3 companies increased recruitment, so 22 new scholars were able to join the Academy
- there are now 49 E3 scholars studying at the three member universities at all levels from Foundation Year to Stage 4 MEng.

Website

Don't forget to visit our re-vamped website at:

www.E3Academy.org

Teams of E3 scholars from different companies and universities work together in a Lean Manufacturing exercise at Summer School.

Our Mission

Since 2007, the E3 Academy has encouraged more young people to study Electrical & Electronic Engineering.

Our current members benefit from a secure supply of talented and well-trained young engineers.
